

School transition portfolio

1

Make a school transition Portfolio for each military child and update it regularly to decrease stress caused by school transitions. Take the portfolio to school or sport registrations while on your house hunting trip.

When you arrive at your child's new school with your custom portfolio you won't have to search for documents, so you can focus on meeting principals, teachers, registrars and guidance counsellors.

Productive meetings with education staff can mean timely registration for programs or placement on waiting lists, and clear communication of your child's needs.
